Tayanna Studios Announces Dark Side of the Moon Launch Date

West Yorkshire, Jan. 27, 2021 - Tayanna Studios is pleased to announce the launch date of their latest FMV game, "The Dark Side of the Moon," will be on March 12th, 2021 through the ultimate destination for playing, discussing and creating games, Steam.

"I am excited to share the amazing work of our fantastic team and the opportunity to tell this deep story which will allow players to feel as if they are living out the adventure themselves that captures the essence of what FMV and interactive story-telling is all about," states producer and game developer, Darren Hall of Tayanna Studios.

The Dark Side of the Moon is the culmination of two years of hard work, with several set backs including a failed Kickstarter to cover production costs and delayed launch dates from online distribution companies who had experienced a backlog of releases. Undeterred and unrelenting, and based on a groundswell of support from Tayanna Studios' fan base, Hall made the decision to release the game via Steam.

"I decided to release the game on Steam because it's truly the perfect platform for this game due to its user-friendly foundation, and its amazing community, plus I will freely admit I'm a Steam addict myself," conveys Hall.

With performances from FMV veterans Anarosa Butler and Rupert Booth, who clearly stand out in the game, Hall is especially proud of the fact that these two characters are larger than life compared to the other characters in the game, especially with Booth's portrayal of "Gedeon."

"Gedeon is really just pure evil. He's not your friend, and I relish his performance in this game from top to bottom," says Hall.

On the topic of Butler, Hall feels her character "Alyx" is a role model for those people who perhaps have insecurities and doubts about themselves.

"Alyx embodies a certain charm that makes us wish we knew someone like her in real life, which I can safely say about Anarosa herself," concludes Hall.

The Dark Side of the Moon will be available for purchase at an introductory price point of £9.99 via Steam starting on March 12th. Hall hopes fans and Steam community members Wishlist the game as of now, and Hall feels that the gaming community will enjoy playing the game as much as he enjoyed producing the game.

Users Can Wishlist the game on Steam via this link:
